

Item description/product images

Description

Material:

Body QT steel.
Tension lever QT steel.

Version:

Body black oxidised.
Clamping face ground.
Tension lever Form C nickel-plated.

Note:

The tension lever can be user-friendly aligned horizontally and vertically in 90° increments by loosening the grub screw.

The workpiece can be clamped with a constant clamping force through the integrated surface on the Form C tension lever.

Advantages:

- High clamping force
- Ground clamping face
- Pull-down force prevents the workpiece lifting

Drawing reference:

- 1) Setscrew
- 2) Cap screw
- 3) Grub screw
- 4) Loosened position
- 5) Clamping travel
- 6) Clamping start position
- 7) Clamped position
