Description

General:

The molybdenum disulphide lubricant UNIMOLY GL 82 is a lubricating grease with MoS₂ for improved fail-safe performance.

Application:

Proven use with roller and plain bearings, slide rails and guides, cams and cam plates, bolts, joints, hinges, cardan shafts, gear racks, screw spindles in all machine and plant construction.

A proven lubricant for wheel bearings and a multi-purpose lubricant for king pins, track and rod joints, cardan shafts and spline shafts.

Advantages:

Contains molybdenum disulphide (MoS₂) for improved wear protection by boundary lubrication, waterproof and corrosion preventive.

Based on automobile manufacturers' requirements.

Overview of items

Order No.	Container	Working temperature	NLGI Class	Rev. characteristic n x dm
97907-0400	400 g cartridge	-20 °C to 130 °C	2	5X100000
97907-1000	1 kg can	-20 °C to 130 °C	2	5X100000
