Description

General:

The copper paste "Wolfracoat C" is a metallic paste for temperatures up to 1200 °C.

Application:

A proven assembly, cutting, lubricating and fastener paste for plain bearings and slide points, chains, roller bearings, in foundries for cores and ejectors, in die-casting machines, exhaust systems of internal combustion engines and furnaces.

Advantages:

The synthetic base oil evaporates at over 200 °C. A dry, metallic lubricant film gradually forms.

Good lubrication of friction points with slide and rolling friction, good separation and lubrication for fastenings with static and dynamic friction, improved sliding for easy assembly of interference and transition fits, easy dismantling when loosening screw fastenings.

Overview of items

Order No.	Container	Working temperature	NLGI Class
97903-060	60 g tube	-30 °C to 1200 °C, over 200 °C is a dry lubricant	2
97903-400	400 ml spray	-30 °C to 1200 °C, over 200 °C is a dry lubricant	2
