

# Safety Data Sheet according to (EC) No 1907/2006 as amended

Page 1 of 31

LOCTITE 603

SDS No. : 642226 V006.0 Revision: 24.06.2024 printing date: 10.10.2024 Replaces version from: 03.08.2023

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

### **1.1. Product identifier** LOCTITE 603

UFI: W9GS-KVCM-A20C-FMU7

**1.2. Relevant identified uses of the substance or mixture and uses advised against** Intended use:

Adhesive

### 1.3. Details of the supplier of the safety data sheet

Henkel AG & Co. KGaA Henkelstr. 67 40589 Düsseldorf

Germany

Phone: +49 211 797 0

SDSinfo.Adhesive@henkel.com For Safety Data Sheet updates please visit our website www.mysds.henkel.com or www.henkel-adhesives.com.

## 1.4. Emergency telephone number

The Henkel information service also provides an around-the-clock telephone service on phone no.+49-(0)211-797-3350 for exceptional cases.

## **SECTION 2: Hazards identification**

### 2.1. Classification of the substance or mixture

## Classification (CLP):

| _ |   |            |
|---|---|------------|
|   | Skin irritation   | Category 2 |
|   | H315 Causes skin irritation.                            |            |
|   | Serious eye damage                                      | Category 1 |
|   | H318 Causes serious eye damage.                         |            |
|   | Skin sensitizer   | Category 1 |
|   | H317 May cause an allergic skin reaction.               |            |
|   | Specific target organ toxicity - single exposure        | Category 3 |
|   | H335 May cause respiratory irritation.                  |            |
|   | Target organ: respiratory tract irritation              |            |
|   | Chronic hazards to the aquatic environment              | Category 3 |
|   | H412 Harmful to aquatic life with long lasting effects. |            |
|   |   |            |

### 2.2. Label elements

Label elements (CLP):

| Hazard pictogram:                      |   |
|--|---|
| Contains                               | 1-Methyltrimethylene dimethacrylate   |
|  | Hydroxypropyl methacrylate<br>Acrylic acid  |
|  | 2,2'-Ethylenedioxydiethyl dimethacrylate  |
|  | Acetic acid, 2-phenylhydrazide<br>methyl methacrylate   |
| Signal word:                           | Danger  |
| Hazard statement:                      | <ul> <li>H315 Causes skin irritation.</li> <li>H317 May cause an allergic skin reaction.</li> <li>H318 Causes serious eye damage.</li> <li>H335 May cause respiratory irritation.</li> <li>H412 Harmful to aquatic life with long lasting effects.</li> </ul>                                 |
| Precautionary statement:               | "***" ***For consumer use only: P101 If medical advice is needed, have product container or label at hand. P102 Keep out of reach of children. P501 Dispose of contents/container in accordance with national regulation.***  |
| Precautionary statement:<br>Prevention | <ul><li>P261 Avoid breathing vapors.</li><li>P273 Avoid release to the environment.</li><li>P280 Wear protective gloves/eye protection.</li></ul>   |
| Precautionary statement:<br>Response   | P302+P352 IF ON SKIN: Wash with plenty of soap and water.<br>P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove<br>contact lenses, if present and easy to do. Continue rinsing.<br>P333+P313 If skin irritation or rash occurs: Get medical advice/attention. |

### 2.3. Other hazards

None if used properly. Classified as Skin irritation Category 2, H315 based on Expert Judgement and experimental data of an OECD 431 test or based on analogy to similar products tested.

Following substances are present in a concentration  $\geq$  the concentration limit for depiction in Section 3 and fulfill the criteria for PBT/vPvB, or were identified as endocrine disruptor (ED):

This mixture does not contain any substances in a concentration  $\geq$  the concentration limit for depiction in Section 3 that are assessed to be a PBT, vPvB or ED.

## **SECTION 3: Composition/information on ingredients**

### 3.2. Mixtures

# Declaration of the ingredients according to CLP (EC) No 1272/2008:

| Hazardous components<br>CAS-No.<br>EC Number<br>REACH-Reg No.                            |               | Classification   | Specific Conc. Limits, M-<br>factors and ATEs   | Add.<br>Information |
|--|---------------|--|---|---------------------|

|-------------------------------|--|--|--|

If no ATE values are displayed, please refer to LD/LC50 values in Section 11. For full text of the H - statements and other abbreviations see section 16 "Other information".

## **SECTION 4: First aid measures**

### 4.1. Description of first aid measures

Inhalation: Move to fresh air. If symptoms persist, seek medical advice.

Skin contact: Rinse with running water and soap. Obtain medical attention if irritation persists.

Eye contact: Rinse immediately with plenty of running water (for 10 minutes), seek medical attention from a specialist.

Ingestion: Rinse mouth, drink 1-2 glasses of water, do not induce vomiting, consult a doctor.

**4.2. Most important symptoms and effects, both acute and delayed** SKIN: Rash, Urticaria.

RESPIRATORY: Irritation, coughing, shortness of breath, chest tightness.

SKIN: Redness, inflammation.

After eye contact: Corrosive, may cause permanent damage to eyes (impairment of vision).

## 4.3. Indication of any immediate medical attention and special treatment needed

See section: Description of first aid measures

## **SECTION 5: Firefighting measures**

### 5.1. Extinguishing media Suitable extinguishing media:

water, carbon dioxide, foam, powder

**Extinguishing media which must not be used for safety reasons:** High pressure waterjet

5.2. Special hazards arising from the substance or mixture
In the event of a fire, carbon monoxide (CO), carbon dioxide (CO2) and nitrogen oxides (NOx) can be released.
5.3. Advice for firefighters
Wear self-contained breathing apparatus and full protective clothing, such as turn-out gear.

### Additional information:

In case of fire, keep containers cool with water spray.

**SECTION 6: Accidental release measures** 

### 6.1. Personal precautions, protective equipment and emergency procedures

Avoid contact with skin and eyes. Wear protective equipment. Ensure adequate ventilation. Keep away from sources of ignition.

### **6.2. Environmental precautions**

Do not empty into drains / surface water / ground water.

### 6.3. Methods and material for containment and cleaning up

Dispose of contaminated material as waste according to Section 13. For small spills wipe up with paper towel and place in container for disposal. For large spills absorb onto inert absorbent material and place in sealed container for disposal.

### 6.4. Reference to other sections

See advice in section 8

## **SECTION 7: Handling and storage**

### 7.1. Precautions for safe handling

Avoid skin and eye contact. See advice in section 8

### Hygiene measures:

Wash hands before work breaks and after finishing work. Do not eat, drink or smoke while working. Good industrial hygiene practices should be observed.

### 7.2. Conditions for safe storage, including any incompatibilities

Ensure good ventilation/extraction. Store in a cool, dry place. Refer to Technical Data Sheet.

**7.3. Specific end use(s)** Adhesive

# SECTION 8: Exposure controls/personal protection

# 8.1. Control parameters

## **Occupational Exposure Limits**

Valid for

Germany

## **Biological Exposure Indices:**

| Ingredient [Regulated substance] | Parameters  | Biological<br>specimen | Sampling time         |          | Basis of biol.<br>exposure index | <br>Additional<br>Information |
|----------------------------------|-------------|------------------------|-----------------------|----------|----------------------------------|-------------------------------|
| Heptane                          | Heptan-2,5- | Urine                  | Sampling time: End of | 250 µg/l | DE BGW                           |                               |
| 142-82-5                         | dione       |                        | shift.                |          |                                  |                               |
| [n-Heptane]                      |             |                        |                       |          |                                  |                               |

### 8.2. Exposure controls:

Engineering controls: Ensure good ventilation/extraction.

Respiratory protection: Ensure adequate ventilation. An approved mask or respirator fitted with an organic vapour cartridge should be worn if the product is used in a poorly ventilated area Filter type: A (EN 14387)

Hand protection:

Chemical-resistant protective gloves (EN 374).

Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374):

nitrile rubber (NBR;  $\geq 0.4$  mm thickness) Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to  $\geq 480$  minutes permeation time as per EN 374):

nitrile rubber (NBR;  $\geq 0.4$  mm thickness)

This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

Eye protection:

Safety glasses with sideshields or chemical safety goggles should be worn if there is a risk of splashing. Protective eye equipment should conform to EN166.

Skin protection: Wear suitable protective clothing. Protective clothing should conform to EN 14605 for liquid splashes or to EN 13982 for dusts.

Advices to personal protection equipment:

The information provided on personal protective equipment is for guidance purposes only. A full risk assessment should be conducted prior to using this product to determine the appropriate personal protective equipment to suit local conditions. Personal protective equipment should conform to the relevant EN standard.

## **SECTION 9: Physical and chemical properties**

### 9.1. Information on basic physical and chemical properties

Delivery form Colour Odor Physical state Melting point liquid green characteristic liquid Not applicable, Product is a liquid SDS No.: 642226 V006.0

| Solidification temperature                       | < -30 °C (< -22 °F)   |
|--|---|
| Initial boiling point                            | >150 °C (>302 °F)   |
| Flammability                                     | The product is not flammable.   |
| Explosive limits                                 | Not applicable, The product is not flammable.   |
| Flash point                                      | > 100 °C (> 212 °F)   |
| Auto-ignition temperature                        | Not applicable, The product is not flammable.   |
| Decomposition temperature                        | Not applicable, Substance/mixture is not self-reactive, no organic peroxide and does not decompose under foreseen conditions of use |
| pH   | Not applicable, Product is non-polar/aprotic.   |
| Viscosity (kinematic)<br>(40 °C (104 °F); )      | > 20,5 mm2/s  |
| Viscosity, dynamic                               | 100,0 - 150,0 mPa.s LCT STM 10; Viscosity Brookfield  |
| (Brookfield; Instrument: RVT; speed of rotation: |   |
| 20 min-1; Spindle No: 1)                         |   |
| Solubility (qualitative)                         | Slight  |
| (20 °C (68 °F); Solvent: Water)                  |   |
| Partition coefficient: n-octanol/water           | Not applicable  |
|  | Mixture   |
| Vapour pressure                                  | < 300 mbar;no method / method unknown   |
| (50 °C (122 °F))                                 |   |
| Vapour pressure                                  | < 3 mm hg   |
| (68 °F (20 °C))                                  |   |
| Vapour pressure                                  | < 0,13 mbar   |
| (20 °C (68 °F))                                  |   |
| Density  | 1,07 g/cm3 no method / method unknown   |
| (20 °C (68 °F))                                  |   |
| Relative vapour density:                         | >1  |
| (20 °C)  |   |
| Particle characteristics                         | Not applicable  |

### 9.2. Other information

Other information not applicable for this product

# **SECTION 10: Stability and reactivity**

**10.1. Reactivity** Reacts with strong oxidants. Acids. Reducing agents. Strong bases.

**10.2. Chemical stability** Stable under recommended storage conditions.

# 10.3. Possibility of hazardous reactions

See section reactivity

## 10.4. Conditions to avoid

Stable under normal conditions of storage and use.

## **10.5. Incompatible materials**

See section reactivity.

## 10.6. Hazardous decomposition products

carbon oxides. Hydrocarbons nitrogen oxides Rapid polymerisation may generate excessive heat and pressure.

## **SECTION 11: Toxicological information**

**General toxicological information:** An allergic reaction cannot be excluded after repeated skin contact.

## 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

## Acute oral toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances      | Value    | Value         | Species | Method  |
|---------------------------|----------|---------------|---------|---|
| CAS-No.                   | type     |               |         |   |
| 4-t-Butylcyclohexyl       | Acute    | 2.001 mg/kg   |         | Expert judgement  |
| methacrylate              | toxicity |               |         |   |
| 46729-07-1                | estimate |               |         |   |
|                           | (ATE)    |               |         |   |
| 1-Methyltrimethylene      | LD50     | > 5.000 mg/kg | rat     | not specified   |
| dimethacrylate            |          |               |         |   |
| 1189-08-8                 |          |               |         |   |
| Hydroxypropyl             | LD50     | > 2.000 mg/kg | rat     | OECD Guideline 401 (Acute Oral Toxicity)                |
| methacrylate              |          |               |         |   |

## Skin corrosion/irritation:

Classified as Skin irritation Category 2, H315 based on Expert Judgement and experimental data of an OECD 431 test or based on analogy to similar products tested.

| Hazardous substances<br>CAS-No.                         | Result                         | Exposure<br>time | Species   | Method  |
|---|--------------------------------|------------------|---|---|
| Hydroxypropyl<br>methacrylate<br>27813-02-1             | not irritating                 | 24 h             | rabbit  | Draize Test   |
| Acrylic acid<br>79-10-7                                 | Sub-Category<br>1A (corrosive) | 3 min            | rabbit  | OECD Guideline 404 (Acute Dermal Irritation / Corrosion)  |

## Aspiration hazard:

No data available.

## 11.2 Information on other hazards

not applicable

## **SECTION 12: Ecological information**

## General ecological information:

Do not empty into drains / surface water / ground water.

LOCTITE 603

## 12.1. Toxicity

## Toxicity (Fish):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances  | Value | Value                          | Exposure time | Species  | Method  |
|---|-------|--------------------------------|---------------|--|---|
| CAS-No.   | type  |                                | _             |  |   |
| 4-t-Butylcyclohexyl<br>methacrylate<br>46729-07-1             | LC50  | Toxicity > Water<br>solubility | 96 h          | Danio rerio  | OECD Guideline 203 (Fish,<br>Acute Toxicity Test)           |
| 1-Methyltrimethylene<br>dimethacrylate<br>1189-08-8           | LC50  | 32,5 mg/l                      | 48 h          |  | DIN 38412-15  |

### Toxicity (microorganisms):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances                                | Value | Value                          | Exposure time | Species   | Method   |
|---|-------|--------------------------------|---------------|---|--|
| CAS-No.   | type  |                                |               |   |  |
| 4-t-Butylcyclohexyl<br>methacrylate<br>46729-07-1   | EC50  | Toxicity > Water<br>solubility | 3 h           | activated sludge of a predominantly domestic sewage | OECD Guideline 209<br>(Activated Sludge,<br>Respiration Inhibition Test) |
| 1-Methyltrimethylene<br>dimethacrylate<br>1189-08-8 | NOEC  | 20 mg/l                        | 28 d          | activated sludge, domestic                          | not specified  |

| Hydroxypropyl methacrylate 27813-02-1                         | EC10 | 1.140 mg/l       | 16 h   |                            | not specified   |
|---|------|------------------|--------|----------------------------|---|
| Acrylic acid<br>79-10-7                                       | EC20 | 900 mg/l         | 30 min | activated sludge, domestic | ISO 8192 (Test for<br>Inhibition of Oxygen<br>Consumption by Activated<br>Sludge) |
| Alcohols, C11-15-secondary,<br>ethoxylated, 9EO<br>68131-40-8 | EC50 | > 1.000 mg/l     | 16 h   | not specified              | not specified   |
| Cumene hydroperoxide<br>80-15-9                               | EC10 | 70 mg/l          | 30 min | not specified              | not specified   |
| methacrylic acid<br>79-41-4                                   | EC10 | 100 mg/l         | 17 h   | Pseudomonas putida         | DIN 38412, part 8<br>(Pseudomonas<br>Zellvermehrungshemm-<br>Test)                |
| methyl methacrylate<br>80-62-6                                | EC20 | > 150 - 200 mg/l | 30 min | activated sludge, domestic | ISO 8192 (Test for<br>Inhibition of Oxygen<br>Consumption by Activated<br>Sludge) |

## 12.2. Persistence and degradability

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances<br>CAS-No.                               | Result                     | Test type | Degradability | Exposure<br>time | Method   |
|---|----------------------------|-----------|---------------|------------------|--|
| 4-t-Butylcyclohexyl<br>methacrylate<br>46729-07-1             | not readily biodegradable. | aerobic   | 63 %          | 28 day           | OECD Guideline 301 D (Ready<br>Biodegradability: Closed Bottle<br>Test)                |
| 1-Methyltrimethylene<br>dimethacrylate<br>1189-08-8           | readily biodegradable      | aerobic   | 84 %          | 28 d             | OECD Guideline 310 (Ready<br>BiodegradabilityCO2 in Sealed<br>Vessels (Headspace Test) |
| Hydroxypropyl methacrylate 27813-02-1                         | readily biodegradable      | aerobic   | 94,2 %        | 28 d             | OECD Guideline 301 E (Ready<br>biodegradability: Modified OECD<br>Screening Test)      |
| Acrylic acid<br>79-10-7                                       | inherently biodegradable   | aerobic   | 100 %         | 28 d             | OECD Guideline 302 B (Inherent<br>biodegradability: Zahn-<br>Wellens/EMPA Test)        |
| Acrylic acid<br>79-10-7                                       | readily biodegradable      | aerobic   | 81 %          | 28 d             | OECD Guideline 301 D (Ready<br>Biodegradability: Closed Bottle<br>Test)                |
| Alcohols, C11-15-secondary,<br>ethoxylated, 9EO<br>68131-40-8 | readily biodegradable      | aerobic   | > 60 %        | 28 d             | OECD Guideline 301 F (Ready<br>Biodegradability: Manometric<br>Respirometry Test)      |
| Cumene hydroperoxide<br>80-15-9                               | not readily biodegradable. | aerobic   | 3 %           | 28 d             | OECD Guideline 301 B (Ready<br>Biodegradability: CO2 Evolution<br>Test)                |
| 2,2'-Ethylenedioxydiethyl<br>dimethacrylate<br>109-16-0       | readily biodegradable      | aerobic   | 85 %          | 28 d             | OECD Guideline 301 B (Ready<br>Biodegradability: CO2 Evolution<br>Test)                |
| methacrylic acid<br>79-41-4                                   | readily biodegradable      | aerobic   | 86 %          | 28 d             | OECD Guideline 301 D (Ready<br>Biodegradability: Closed Bottle<br>Test)                |
| methacrylic acid<br>79-41-4                                   | inherently biodegradable   | aerobic   | 100 %         | 14 d             | OECD Guideline 302 B (Inherent<br>biodegradability: Zahn-<br>Wellens/EMPA Test)        |
| methyl methacrylate<br>80-62-6                                | readily biodegradable      | aerobic   | 94 %          | 14 d             | OECD Guideline 301 C (Ready<br>Biodegradability: Modified MITI<br>Test (I))            |
| Acetic acid, 2-<br>phenylhydrazide<br>114-83-0                | not readily biodegradable. | aerobic   | 39 %          | 28 d             | OECD Guideline 301 D (Ready<br>Biodegradability: Closed Bottle<br>Test)                |
| n-Heptane<br>142-82-5   | readily biodegradable      | aerobic   | 70 %          | 10 d             | other guideline:   |

## 12.3. Bioaccumulative potential

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances<br>CAS-No.                               | Bioconcentratio<br>n factor (BCF) | Exposure time | Temperature | Species     | Method  |
|---|-----------------------------------|---------------|-------------|-------------|---|
| Acrylic acid<br>79-10-7                                       | 3,16                              |               |             |             | QSAR (Quantitative Structure<br>Activity Relationship)              |
| Alcohols, C11-15-secondary,<br>ethoxylated, 9EO<br>68131-40-8 | 29                                |               |             | calculation | OECD Guideline 305<br>(Bioconcentration: Flow-through<br>Fish Test) |
| Cumene hydroperoxide<br>80-15-9                               | 9,1                               |               |             | calculation | OECD Guideline 305<br>(Bioconcentration: Flow-through<br>Fish Test) |
| n-Heptane<br>142-82-5   | 552                               |               |             | calculation | QSAR (Quantitative Structure<br>Activity Relationship)              |

## 12.4. Mobility in soil

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances  | LogPow      | Temperature | Method   |
|---|-------------|-------------|--|
| CAS-No.<br>4-t-Butylcyclohexyl<br>methacrylate<br>46729-07-1  | 5,83 - 6,07 | 30 °C       | OECD Guideline 117 (Partition Coefficient (n-octanol / water), HPLC Method)        |
| Hydroxypropyl methacrylate 27813-02-1                         | 0,97        | 20 °C       | not specified  |
| Acrylic acid<br>79-10-7                                       | 0,46        | 25 °C       | OECD Guideline 107 (Partition Coefficient (n-octanol / water), Shake Flask Method) |
| Alcohols, C11-15-secondary,<br>ethoxylated, 9EO<br>68131-40-8 | 2,72        |             | OECD Guideline 107 (Partition Coefficient (n-octanol / water), Shake Flask Method) |
| Cumene hydroperoxide<br>80-15-9                               | 1,6         | 25 °C       | OECD Guideline 117 (Partition Coefficient (n-octanol / water), HPLC Method)        |
| 2,2'-Ethylenedioxydiethyl<br>dimethacrylate<br>109-16-0       | 2,3         |             | OECD Guideline 117 (Partition Coefficient (n-octanol / water), HPLC Method)        |
| methacrylic acid<br>79-41-4                                   | 0,93        | 22 °C       | OECD Guideline 107 (Partition Coefficient (n-octanol / water), Shake Flask Method) |
| methyl methacrylate<br>80-62-6                                | 1,38        | 20 °C       | other guideline:   |
| Acetic acid, 2-<br>phenylhydrazide<br>114-83-0                | 0,74        |             | QSAR (Quantitative Structure Activity Relationship)                                |
| n-Heptane<br>142-82-5   | 4,66        |             | OECD Guideline 107 (Partition Coefficient (n-octanol / water), Shake Flask Method) |

### 12.5. Results of PBT and vPvB assessment

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances                         | PBT / vPvB   |
|--|--|
| CAS-No.                                      |  |
| 4-t-Butylcyclohexyl methacrylate             | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 46729-07-1                                   | Bioaccumulative (vPvB) criteria.   |
| 1-Methyltrimethylene dimethacrylate          | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 1189-08-8                                    | Bioaccumulative (vPvB) criteria.   |
| Hydroxypropyl methacrylate                   | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 27813-02-1                                   | Bioaccumulative (vPvB) criteria.   |
| Acrylic acid                                 | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 79-10-7                                      | Bioaccumulative (vPvB) criteria.   |
| Alcohols, C11-15-secondary, ethoxylated, 9EO | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 68131-40-8                                   | Bioaccumulative (vPvB) criteria.   |
| Cumene hydroperoxide                         | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 80-15-9                                      | Bioaccumulative (vPvB) criteria.   |
| 2,2'-Ethylenedioxydiethyl dimethacrylate     | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 109-16-0                                     | Bioaccumulative (vPvB) criteria.   |
| methacrylic acid                             | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 79-41-4                                      | Bioaccumulative (vPvB) criteria.   |
| methyl methacrylate                          | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 80-62-6                                      | Bioaccumulative (vPvB) criteria.   |
| Acetic acid, 2-phenylhydrazide               | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 114-83-0                                     | Bioaccumulative (vPvB) criteria.   |
| n-Heptane                                    | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 142-82-5                                     | Bioaccumulative (vPvB) criteria.   |

## **12.6. Endocrine disrupting properties**

not applicable

### 12.7. Other adverse effects

No data available.

## **SECTION 13: Disposal considerations**

### **13.1.** Waste treatment methods

Product disposal:

Do not empty into drains / surface water / ground water. Dispose of in accordance with local and national regulations.

LOCTITE 603

Disposal of uncleaned packages:

After use, tubes, cartons and bottles containing residual product should be disposed of as chemically contaminated waste in an authorised legal land fill site or incinerated.

### Waste code

14.2.

08 04 09\* waste adhesives and sealants containing organic solvents and other dangerous substances

The valid EWC waste code numbers are source-related. The manufacturer is therefore unable to specify EWC waste codes for the articles or products used in the various sectors. The EWC codes listed are intended as a recommendation for users. We will be happy to advise you.

## **SECTION 14: Transport information**

### 14.1. UN number or ID number

| langerous goods<br>langerous goods |

### **Further information:**

This Safety Data Sheet has been produced for sales from Henkel to parties purchasing from Henkel, is based on Regulation (EC) No 1907/2006 and provides information in accordance with applicable regulations of the European Union only. In that respect, no statement, warranty or representation of any kind is given as to compliance with any statutory laws or regulations of any other jurisdiction or territory other than the European Union. When exporting to territories other than the European Union, please consult with the respective Safety Data Sheet of the concerned territory to ensure compliance or liaise with Henkel's Product Safety and Regulatory Affairs Department (SDSinfo.Adhesive@henkel.com) prior to export to other territories than the European Union.

This information is based on our current level of knowledge and relates to the product in the state in which it is delivered. It is intended to describe our products from the point of view of safety requirements and is not intended to guarantee any particular properties.

### Dear Customer,

Henkel is committed to creating a sustainable future by promoting opportunities along the entire value chain. If you would like to contribute by switching from a paper to the electronic version of SDS, please contact the local Customer Service representative. We recommend to use a non-personal email address (e.g. SDS@your\_company.com).

Relevant changes in this safety data sheet are indicated by vertical lines at the left margin in the body of this document. Corresponding text is displayed in a different color on shadowed fields.
